The world is getting more complex and things are changing rapidly. Whether you're a large multinational company, a small or medium-sized business, a public or private institution, a city, town, municipality or local authority, finding solutions requires both in-depth specialist knowledge and an interdisciplinary approach.

WELCOME TO BBH.

We take care of complex issues so that our clients can focus on their business and what they do best. Every day, we work together to make the climate and energy transition a success, to build resilient infrastructure and to create a healthy and growing economy for the future. We're committed to safeguarding essential public services and ensuring a future worth living for the generations to come.

CONNECTING THE PIECES. SOLVING THE PUZZLE.

7,000+ clients

1,000+ employees

50+ fields of expertise

7 offices

At BBH, we believe in collaborative leadership, shared responsibility and long-term employee retention – all based on a shared understanding of our values. Every client is unique. And so are our 1,000 employees and partners, who cover more than 50 areas of legal, economic and technical expertise across a total of 7 offices. Our size and breadth of expertise allows us to put together a bespoke interdisciplinary team for every task and job profile.

This is what makes our advisory approach so unique – we pursue the goals of our more than 7,000 clients as if they were our own, while offering guidance in complex environments:

Mediation

Power plant planning

Rights of way and easement for lines/pipes

Corporate finance

MAKING A COMPLEX WORLD MORE COMPREHENSIBLE.

Digital rights management

Unbundling

Management accounting

THE SMALLEST DETAILS.
FOR THE BIG PICTURE.

- 14 Energy
- 18 Infrastructure
- 22 Business

The challenges of the coming years couldn't be any more exciting or socially relevant than in our core segments of energy and infrastructure, not to mention our comprehensive support services for businesses.

NETWORKED THINKING. FOR PRECISE SOLUTIONS.

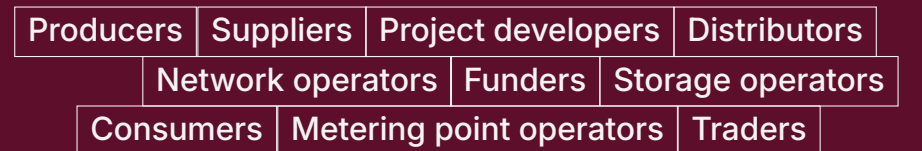

Topic

Energy

At BBH, we see energy as essential to social development and sustainable economic growth.

In our legal and strategic advisory practice, we've established deep roots in every conceivable area of the energy sector:

This allows us to provide consulting services that take into account the full complexity of both the energy sector and the consumer side (from small-scale to large-scale). Our collaborative approach is backed up by more than 450 experts and over 35 years of experience.

WORKING TODAY.
DELIVERING THE
INFRASTRUCTURE OF
TOMORROW.

Topic

Infrastructure

Local and national infrastructure forms the backbone of modern public services:

Water supply | Wastewater management

Circular economy | Residential neighbourhoods

Fibre-optic networks | Road networks | Public transport

Airports | Ports | Data centres | Healthcare services

Not only do we look at the big picture and all the details and connections of each system, but we also provide comprehensive, cross-disciplinary consulting services. Tomorrow's sustainable infrastructure depends on this integrated approach.

YOUR COMPLEXITY
IS OUR DAILY BUSINESS.

Topic

Business

Every company should focus on consistently serving its market segment, instead of getting sidetracked by other things.

We help take the pressure off – from the collection of debts to the award of contracts. Businesses also need to think strategically about the future. We can help with data, feedback, ideas and brainstorming. For our clients, that means less complexity. For us, it's just business as usual – from employment and labour law to public procurement procedures. What's more, our approach covers everything:

Business management | Law

Engineering | Strategy

Municipal law
Expert services
Asset management

COMPLEX IN NATURE. BUT CLEAR IN MESSAGE.

Data protection
Special audit reports

Engineering services
Insolvency law

Subsidy law
Funding models
Feasibility studies

Over the past 35 years, we've worked with more than 7,000 clients from a wide variety of sectors and fields, including cities, towns, municipalities, local authorities, companies, corporate groups, associations and working groups. Despite their differences, they all shared the same goal: they were looking for multidisciplinary consulting services from a single provider. To meet this need, we work behind the scenes to bring together everything you need in a transparent yet independent manner.

We started out small, with a narrow focus. But we've steadily broadened our knowledge and expertise – from the energy sector to a wide range of industries and from infrastructure to medium-sized service providers and Germany's largest music rights association. We're proud of what we've achieved. Now, 35 years after the firm was founded, we're united not by our focus on a single discipline or industry, but rather a shared mindset.
